The natural, organic, and magical ingredients included in my most masculine of formulas is of the utmost importance. I have searched the world over by hot air balloon and the vastness of the oceans by humpback whale to bring you the best ingredients nature has to offer, and I can confidently say I have succeeded in that search.

Tea Tree Oil stimulates the beard follicle and promotes beard growth. But that's not all: like a friend readily armed with hand sanitizer, tea tree oil also has powerful antibacterial, antifungal, and antiviral properties, making it effective against dandruff, itching, acne, warts, and more. Pretty fantastic, huh?

Argan Oil is incredibly rich, like a certain famous duck's uncle known for swimming in gold. But instead of gold, argan oil is rich in vitamins A and E, as well as packed with fatty acids, linoleic acids, and antioxidants, making it very moisturizing and anti-inflammatory. As if superhuman, it can even encourage cell regeneration! Nice as sliced spice pies!

Rosemary Oil isn't just delicious; it also stimulates a significant increase in new beard growth. It works to decrease beard loss and improve the microcirculation of the beard-yielding skin, also known as your face. Plus, it can help with dandruff, dry scalp, and balding. Simply sensational!

If you aren't impressed yet than chances are you wouldn't be moved by the remarkably suave monkey in a top hat I once saw robbing a liquor store. Anyway, Polished Gentleman has a multitude of incredible, natural, and supernatural ingredients making our products as healthy, effective, and gentlemanly as they are.
