## A Complete Event Overview

Many museums book events first-come, first-serve – but this gets complicated when each department has its own schedule and calendar. Plus, things like traffic flow, sound bleed, or exhibits with sensitive content need to be factored in.

Ungerboeck delivers a holistic view of all events at your organization while making it easy to dig down into the fine details of each one.

# We Have a Solution for That

Most museums and cultural attractions share the same six concerns – and Ungerboeck can help with each one.

## Team Member Shortages

Make the most of a small team with tools that boost efficiency and automate tasks.

## Volunteer Management

Track shifts, store information, and send mass communications so all hours are covered.

## Customer Service

Professionalize your customer dealings with our intuitive, self-serve platforms.

## Mission Work

Extend your organization's reach beyond the community using virtual meeting options.

## Finances & Reporting

Gain valuable insights into your event operations with accurate and detailed reports.

## Software that Scales

You'll never outgrow Ungerboeck. Our system is configured to scale with your business.

## Eight Weeks is All it Took

When the Museum of Contemporary Art Australia (MCA) moved its event and venue management system to a cloud-based platform, speed was a key consideration.

Ungerboeck implemented a transition plan that was so seamless, a migration that would normally take up to a year to complete was done in only eight weeks.

“

The Ungerboeck team was amazing collaborating with MCA to meet our requirements. Our user experience has already significantly improved since our transition to the cloud.

”
