

**“There is no excuse to stop reading.”**

The background story to preceding this personal review is based on my personal story. In 2019, I intended to gain my amount of book reads in order to gain knowledge and broaden my perspective as well. Along with this journey I bought some books in different genre, whether it's fiction or non-fiction. I will read books in different places, in class, in canteen andv in the bus. Latter I found to bring these books in my bag is a burden for me and it makes my shoulder feel so exhausted to bring these thick pages books.

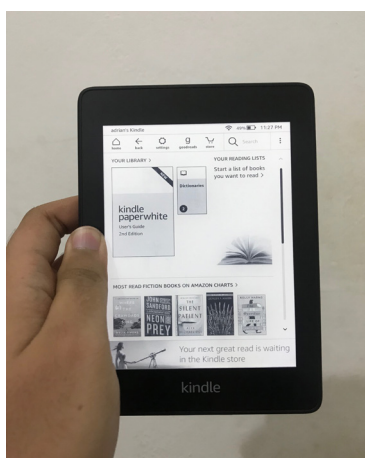

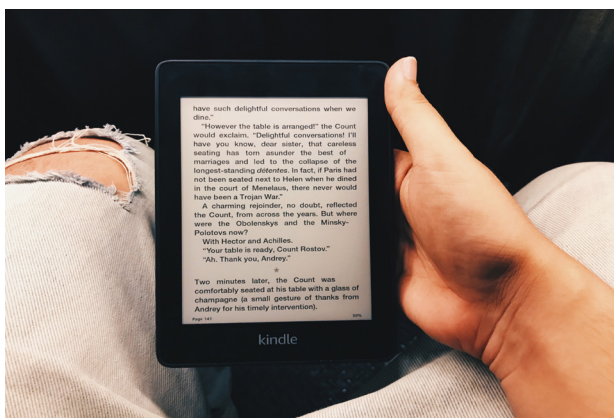

Then I try to buy some e-book on an e-commerce and read it on my phone. It works for me and it's useful to lighten my burden as well. Nevertheless, I got eye-strained while I'm reading using a phone due to the LCD display used for phone and television. It is make me feel to consider my eye health when it gets to read on a phone. Then my friend introduced me to an e-book reader. I know there is e-book if you want to take into a new stage of digital reading. But I never know these e-books required a reader to operate them. After making trade-offs, I decided an E-book reader a product by Amazon, and it is called Kindle.

My first personal experience to using this 21st century device is I feel awkward. It takes time to me to get used to read on a device with almost uncanny accuracy with original paper. Because kindle using E-ink Carta touchscreen technology on the display that makes the reader don't have to worry about eye-strain issues while read for long time. The storage is double-up from the previous kindle edition, my Kindle Paperwhite 2018 edition get storage 8gb to save thousands of book in our digital bookshelf.

For digital reading experience, a reader needs a device that can keep up a long with them to keep up to their reading activity. Kindle Paperwhite is a very suitable device for the heavy revader as well, because the battery can last for a month with a single charge thanks to the E-ink Carta touchscreen technology. I personally charging it once for two weeks for 2 hours a day usage.

You can bring your new edition Kindle along with you through every places and variety of condition and weather as well. You can bring it while you waiting for public transportation on a terminal, reading it on a long flight across nations and this new Kindle Paperwhite 2018 edition is make the readers like you would be able to read on a beach thanks to the water-resistant technology certified IPX8 so if you accidentally drop your kindle in the water you don't have to worry you may broke the kindle.
