

GCX[®]

Mounting Solutions

From the worldwide leader in medical instrument
and IT mounting solutions.

The Challenge

When you need to purchase new mounting solutions for construction or upgrades, you need them quickly, efficiently and cost-effectively – keeping your project on schedule *while not disrupting your active rooms.*

The Solution

GCX On-Site Services offers turnkey experience, expertise and management. We handle everything from computer hardware to OEM equipment to medical devices, including anesthesia machines, fetal monitors, telemedicine, telemetry, and accessories.

GCX On-Site Services

GCX On-Site Services

is the worldwide leader

We offer day-to-day, hands-on use of medical devices within your healthcare environment, with staff who work around your active areas and occupied rooms' schedules. We require a minimum of management time to update your existing mounting solutions, haul it away, and clean up your rooms.

5 WAYS

your medical/biomedical team can benefit from GCX

1. We're adjustable and tailored to meet your ergonomic needs.

Whether you're a nurse, a nurse manager, or a physician, our ergonomic, weight-bearing biomedical mounts feature counter-balanced springs to move equipment with less than 5 lbs. of force. We'll even train your staff on our equipment.

2. We operate on your schedule, not ours.

We conform to your hospital's equipment schedule. So we can add our equipment when your anesthesia machines are not in use—after hours or on weekends. Equip your anesthesia machines for EMR and safely support devices in various configurations.

3. We have 40 years of biomed department experience.

As an OEM Supplier, we have over four decades of experience with biomedical monitoring equipment. We fully understand their design and application. In fact, our experience often helps guide our customers to the most useful accessories for optimal configuration.

4. We manage new construction projects.

For new facilities or expansions, we meet with your project manager, help set-up a mock-up room, and run the whole project — from blueprint to completion.

5. We free up your staff.

We focus on what we do best so your clinical staff can focus on their core competency — healing your patients or maintaining your processes.

What do GCX customers say about us?

"I wish all vendor installs went that smoothly! I'd much prefer to have GCX do the work."

— Methodist Hospital
Dallas, TX

"Thank you. So far, the department is really enjoying the new wall/rail-mounts. I hope there will be more wall/rail-mounting in other areas..."

— Kaiser Permanente
Baldwin Park, CA

"None of your competitors do this."

— Baptist Health
Little Rock, AR

5 WAYS

your IT Team can benefit from GCX

1. We facilitate your EMR processes & systems.

GCX equipment helps ensure your facility's EMR initiatives won't disrupt your workflow. Our experienced technicians are fully vaccinated and credentialed by Vendormate® to cost-efficiently add EMR mounting systems — with regulatory compliance and without disrupting your workflow.

2. We maximize IT equipment with proactive project management

We manage the entire process from pre-order through completion, with pre-assembly, green packaging, delivery, assembly, and clean up. We are available to train the end-users in the proper use of our products. We ask for user preferences, encouraging customization.

3. We optimize equipment workflow.

We mount customer hardware, manage and organize cables and provide ample storage for supplies with space-saving designs and slim profiles. This helps meet the needs of multiple users and enhance operational workflow.

4. We offer cost-effective technology upgrades.

When upgrading your equipment, GCX can remove the devices, replace or upgrade the mounting solutions, and assemble your new equipment. Our services include ergonomic adjustments and cable management.

5. We provide economical turnkey operations.

You don't have to coordinate multiple teams or call in costly third-party vendors. Just hand us your hardware and let our GCX staff do the rest with on-site management and total accountability for cost savings.

We offer standards compliance.

GCX is dedicated specifically to the medical industry and is proud to be ISO 13485:2003 Certified—the same standards required by medical device manufacturers.

We're green.

GCX is a Sonoma County Green Business and has fulfilled requirements to receive the Platinum Green Certificate by the Green Business Bureau (GBB).

About GCX

Since 1971, our mission has been to enable caregivers to deliver improved patient care. We've accomplished this by making quality, reliability, and durability the cornerstones of every GCX product.
