

BUILDING THE INDUSTRIES OF THE FUTURE

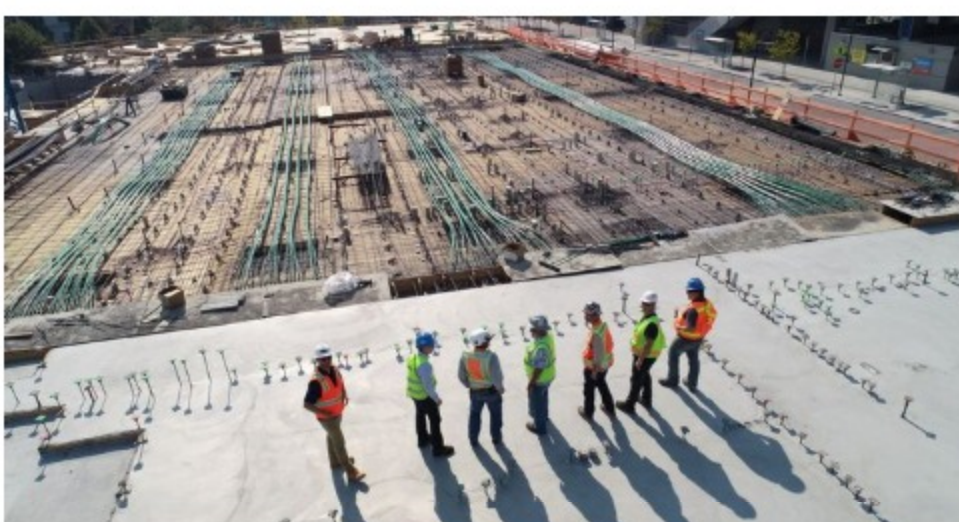

Advanced Vision Morocco is one of the most respected construction companies in Africa, specializing in sophisticated electro-mechanical works. Based on the core values of teamwork, integrity and commitment, we have matured into one of Africa's pre-eminent companies in the rapidly evolving MEP sector.

Together with our customers, we deliver landmark projects that create long- term progress and economic growth.

A New Standard in MEP Applications

Advanced Vision Morocco has earned industry-wide recognition for undertaking challenging projects, fostering innovation, embracing emerging technologies, and exceeding expectations. Our experience, resourcefulness, and technical knowledge has grown our company into one of Africa's uncontested leaders.

Innovation is at the core of what we do. When our engineers encounter some of the most complex and challenging problems, we apply our ingenuity and creativity to find innovative solutions.

A Proven Approach

With humble beginnings in the Arabian Gulf, AVM experienced a period of accelerating success and rapid growth, before moving our headquarters to Casablanca in 2013 in order to focus on and develop the African market. Since then, our portfolio has grown to include over 45 major construction projects that span the whole of Africa.

AVM's ability to address changing conditions and demands, find and serve new markets, and expand its services has seen our company grow far beyond its humble origins.

Trust is Earned, Not Given

Among our satisfied clients we are happy to count: Siemens, Marriott, the Ritz- Carlton, JTEKT, Amazon and Faurecia, among others. These clients, and many more, trusted us to reduce risk, increase quality and lower costs. We are privileged to repay that trust with timely delivery, surpassed expectations, and *exceptional* return on investment.

That is the promise, implicit in the AVM name, that we make to every client: a promise of unrivalled workmanship and guaranteed performance, backed by an iron-clad reputation, and sealed with a handshake.
