Our Policy

Safety First

Advanced Vision Morocco has earned the **ISO 9001**, **14001** and **18001** certifications. The **OHSAS 18001** recognizes the development and implementation of a comprehensive safety program that strives to maintain the safest possible work environment.

Our safety-first philosophy strives to eliminate worksite incidents through pre-planning our activities with safety engagement commencing at the earliest phases of the project. This philosophy, along with our policies, mandatory safety inspections and training programs have created a comprehensive and effective safety organization; and a stellar safety record.

Core Values

AVM understands the environmental, social, and economic impact of our activities and that it is our responsibility, and in our interest, to conduct our business in a transparent and ethical manner that supports our performance goals, which are:

- Client service
- Community involvement
- Environmental performance
- Financial strength
- Employee health, safety and wellbeing

Social Responsibility

Our core values of integrity, teamwork and commitment guide our activities and we expect the organizations with which we do business to share these commitments.

Recognizing that sustainable best practices have changed and will continue to evolve, AVM will lead by example and serve as ambassadors for environmental, social and economic sustainability. We will utilize our technical expertise to create a healthy, prosperous and sustainable future for our people, clients and the environment.
