From Taiwan to UAB: A journey fueled by passion for science and research

“Prior to enrolling at UAB, I pursued my bachelor's degree in marine biotechnology in Taiwan. An internship at Dongsha Atoll inspired me to develop a deep passion for science and research, one that was independent of electronic devices. Drawing from these formative experiences, I resolved to pursue advanced academic pursuits. Given UAB's reputation for excellence in the biomedical field and its renowned research program, it was an attractive choice for me.”
