

# Inventive ways to use Embotics® vCommander™

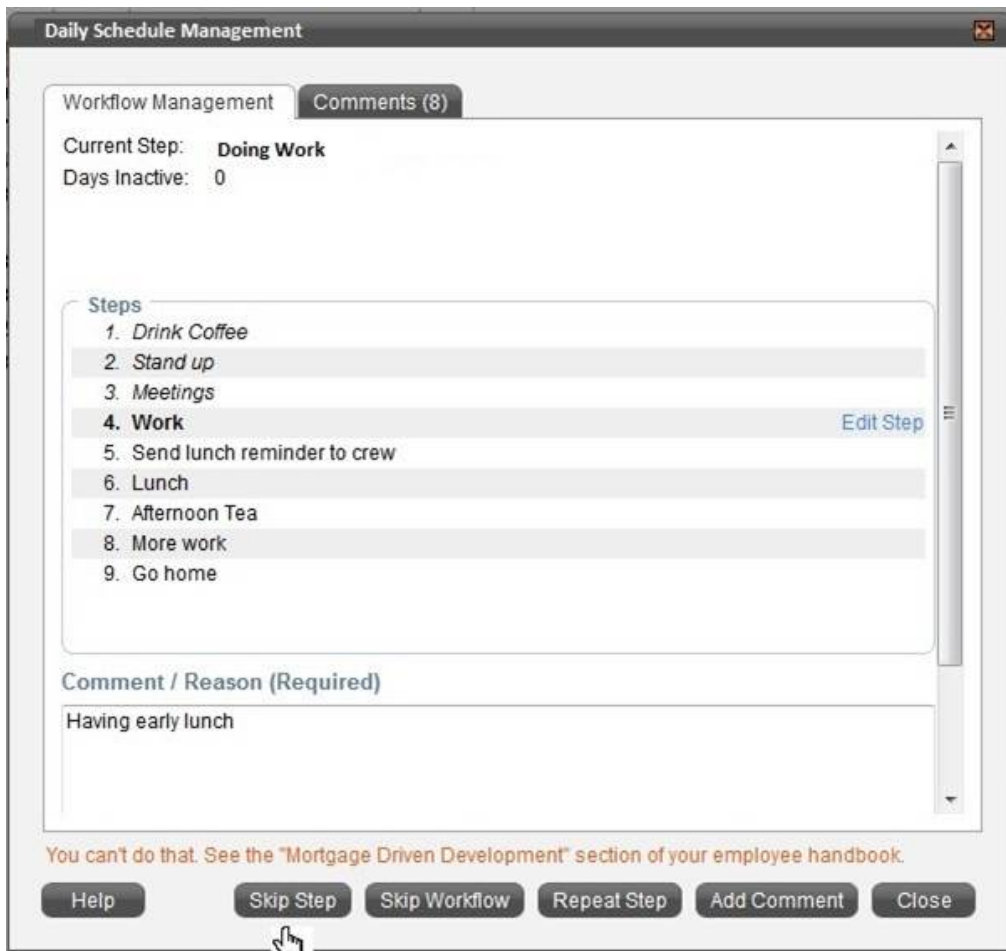

by **Helen Abbott**, on Sep 11, 2015 8:00:00 AM

Embotics® vCommander™ is so easy to use that our development team has come up with some inventive ways to use it. For instance, did you know that you can use vCommander to manage your daily schedule? vCommander's command workflows make it easy.

*Command workflows make managing your daily schedule a breeze.*

You can manage each step of the workflow, skipping or repeating steps as needed.

*Skip or repeat workflow steps... unless an administrator has decided otherwise.*

If your vCommander administrator has prevented you from skipping a step, well, maybe there's a REST API function to do it. vCommander's REST API has an easy-to-use PowerShell client with a bonus Start-Lunch function.

```
PS H:\> Import-Module EmboticsCrew
PS H:\> Get-Command -Module EmboticsCrew
CommandType      Name
-----
Function         Start-Lunch
Module Name      EmboticsCrew

PS H:\> Start-Lunch -time "Noon"
Stomach initialized
Brain mode: Non-Serious
Lunch box - initializing...
Start-Lunch : Lunch Box : food missing
At line:1 char:1
+ Start-Lunch -time "Noon"
+ ~~~~~
+ CategoryInfo          : NotSpecified: (:) [Write-Error], WriteErrorException
+ FullyQualifiedErrorId : Microsoft.PowerShell.Commands.WriteErrorException,Start-Lunch

Heart start pumping blood
Ass-Moving Engine cranking...
Wallet reluctantly opens
Legs set to food acquisition mode
Alarm clock set to 15 minutes with reminder to crew : DON'T BE LATE!
```

*You can try to get around annoying rules with the vCommander REST API.*

To invite your team to lunch, just set up a lunch service and an approval workflow. vCommander creates a hyperlink that invitees can use to RSVP. That's all there is to it.

Subject: Your presence in the kitchen is needed

## Your presence in the kitchen is needed

### Summary

You have been invited to the cool kids party.  
It will be held in the kitchen. Food are provided by the company. You should find them inside your lunch box at your desk.

This party is called "Lunch". Please RSVP by following the link below.

```
#{target.workflowCompleted} : false  
#{target.lunch.timestamp} : Noon  
#{target.attitude} : Non-Serious
```

<b>ID:</b>	72
<b>Workflow Name:</b>	Daily Schedule
<b>Initiated By:</b>	regular.joe
<b>Date Submitted:</b>	Today

### Action Required

To approve or reject this workflow, click the link or copy and paste it into your browser.

<https://elmo.embotics.com:8443/vmrequest/workflowaction?UUID=ce66a360-1082-4b52-858a-43681e4bc8f3>

*Invite your colleagues for lunch and have them RSVP – with vCommander!*

So, there you have it. Using vCommander is as easy as inviting your teammates to lunch.
