<p>Got the Monday blues? Take it one day at a time because YOU GOT THIS!</p>	<p>#LouisianaHemophiliaFoundation #HemophiliaAwareness #MondayBlues</p> <p>@Hope for Hemophilia @Hemophilia Awareness</p>	 <p>https://www.hemophilia.org/</p>
<p>What is Hemophilia? Hemophilia is a medical condition in which the ability of the blood to clot is severely reduced. This causes the sufferer to bleed severely from even a slight injury.</p>	<p>#LouisianaHemophiliaFoundation #HemophiliaAwareness</p> <p>@Children’s Health @National Hemophilia Foundation @Living with Hemophilia</p>	 <p>https://www.hemophilia.org/</p>
<p>Share this post if you know anybody suffering from the effects of Hemophilia. If you need support, please contact LHF at 225-291-1675</p>	<p>#LouisianaHemophiliaFoundation #HemophiliaAwareness</p> <p>@Hope for Hemophilia @Hemophilia Awareness</p>	 <p>https://kidshealth.org/en/parents/hemophilia.html</p>
<p>Did you know that Hemophilia is the most expensive chronic disorder that someone can have? Required medications can cost up to millions per year and insurance barely covers any of it. If you want to donate, please visit the link in our bio</p>	<p>#LouisianaHemophiliaFoundation #HemophiliaAwareness</p> <p>@Children’s Health @National Hemophilia Foundation @Living with Hemophilia</p>	 <p>https://www.medicalnewstoday.com/articles/154880.ph</p>

or our website
lahemo.org.

What causes Hemophilia?
Hemophilia is caused by a genetic mutation. The mutations involve genes that code for proteins that are essential in the blood clotting process. The bleeding symptoms arise because blood clotting is impaired.
