8 Best Cemetery Management Software Compared 2020

Having the right tools at your disposal to perform your job efficiently is priceless. For cemetery management, we're becoming increasingly aware of the need to progress from using paper ledgers and Excel spreadsheets to cemetery management software that addresses the specific mapping problems faced in this industry.

What is Cemetery Software?

As a cemetery administrator, you're all too aware that not many outside of the industry really understands the very specific challenges that you face every day. Forgive the pun, but cemetery management is quite niche!

Good cemetery software digitises your cemetery management processes and record-keeping. Great cemetery software transforms and simplifies the way your cemetery is mapped and how you manage your cemetery's data, affordably, while contributing positively to the legacy of your community.

What Features Should Exist on Cemetery Software?

When looking for the right software to help your cemetery's management, keep in mind that you're looking for tools that will **provide consistency for your cemetery's maps**, eliminate the need for paper records, and **offer instant visualisation** of the status of each of your cemetery's plots. Excel is a thing of the past – you're looking for software tailored to your needs, not a clumsy, catch-all program.

Don't forget, the cemetery is at the heart of the community's history, so software that makes it **simple for you and others to share** those memories is essential in today's social world.

Equally as important is the need for cemetery software to be **affordable with transparent pricing**, depending on what your cemetery can afford – big or small. That being said, let's compare 8 of the best cemetery software platforms out there today so that you can make an informed choice moving forward.

The Contenders – A Cemetery Mapping Software Comparison

CemSites

CemSites has become fairly popular in the US, being implemented in more than 40 states since its establishment in 2012, by Founders Scott McAfee and Sean Johnson. "Cloud Software for Cemeteries", this cloud-based platform specialises in cemetery record management software (CRM), obituaries and stories, and report management, aimed at saving cemeteries time and money.
