

POWERING UP BUSINESS INSIGHTS WITH GENSUITE'S INTEGRATED TABLEAU® SOLUTION

Collecting data is crucial for organizations to effectively understand the inner workings of their company and develop future-focused business strategies. As technology evolves, companies are collecting & storing more data than ever before - but, are they always utilizing that data to its full potential?

A global food and beverage supplier turned to Gensuite for their data and analytics solution.

BUSINESS PROFILE

- ⦿ Global food and beverage supplier
- ⦿ Publically traded
- ⦿ Over 4,000 employees

BUSINESS NEEDS

- ⦿ To replace pen and paper spreadsheets at each site with a standardized, digital software solution
- ⦿ To provide an easy-to-understand and implement system
- ⦿ Various reporting and charting methods to more effectively visualize and present findings

SPECIFIC QMS/IT NEEDS

- ⦿ Intuitive interface for enterprise-wide deployment
- ⦿ Mobile capabilities for deployment within multiple facilities
- ⦿ Integrated data analytics & reporting for continuous improvement

GENSUITE SOLUTION

Gensuite's Analytics | powered by Tableau®, was the perfect solution for this company. Providing a combination of EHS data evaluation, mining and predictive analyses across all levels of an organization. Using this software, EHS and Operational leadership teams were able to:

- ⦿ Engage employees across departments and geographic locations to streamline data mining, reporting and charting tools right out-of-the-box
- ⦿ Visualize site and organization-wide data with flexible EHS reporting and visualization tools and user-driven custom filtering options
- ⦿ Integrated dashboards across applications personalized by user and organization scope
- ⦿ Leverage trending snapshots for business process "instant insights"
- ⦿ Utilize data warehouse (DWH) options, including customized data feeds for consolidation into external DWH platforms and Gensuite-hosted DWH solutions

RESULTS & BENEFITS

- Over 2,700 employees across 20+ countries are utilizing the Gensuite platform
- 96,000+ data records logged and made easy to find & filter
- 1,250,000 user actions logged and counting
- Over 193 custom Tableau reports created, enabling the management eco inventory data, safety statistics and application reports
- A fully configurable reporting system allowing robust data collection and customizable reporting

KEYS TO SUCCESS

- Launch your Gensuite solution in phases, starting with the basics, to acquire immediate internal buy-in and engagement
- Monitor your launch closely to identify areas of success and target areas of improvement
- Engage each of your sites differently by setting unique expectations and encourage your team members to collaborate and share data
- Ensure that your solution truly meets your needs by customizing features to work specifically for your team

SOLUTION HIGHLIGHTS

“User friendly, customized reports at your fingertips.”

- Global Digital EHS Manager
