

Alfredo Hoyos, M.D.

is a world-renowned plastic surgeon who created high definition liposuction and other ground-breaking advanced body contouring techniques in plastic surgery. His specialties, in addition to plastic surgery, include aesthetic plastic surgery, maxofacial surgery, and hand surgery.

As Chief Scientific Officer for Global Stem Cells Group, Dr Hoyos is a frequently featured speaker and representative of GSCG in Miami and Colombia.

Born in Bogota, Colombia March 26, 1972, Dr. Hoyos received a bachelor's degree in Education at the School Mayor Del Rosario, Colombia, and his M.D. at Rosario University, Colombia. He completed visiting fellowships in aesthetic surgery at New York University in NYC, in maxofacial surgery at Mount Sinai Hospital in New York, NYC, and in facial aesthetic surgery at Manhattan Eye, Ear and Throat Hospital in New York.

Dr. Hoyos combined his innovative plastic surgery techniques with different technologies, such as ultrasound-assisted VASER, achieving coveted results in liposculpture.

He invented high definition liposculpture (HDL) and dynamic definition in lipoplasty (4D) techniques, as well as other advanced techniques focused on body contouring. He has also refined techniques in fat transfer (buttock and pectoral lipograft) and breast augmentation.

Alongside colleagues, Dr. Hoyos has performed numerous VASER high definition procedures with consistent results. Ever an innovator, Dr. Hoyos continues to refine these techniques while researching and developing new applications of HD in new areas of the body for the field of cosmetic surgery.

ALFREDOHOYOS

Dr. Hoyos is the author of several books and scientific articles that discuss innovations and new technologies in body contouring. He co-authored the book, *High Definition Body Contouring and advanced Lipoplasty Techniques*, in which he reveals details of his new techniques and technologies in aesthetic surgery.

Dr. Hoyos takes advantage of his talent as a painter and sculptor to **perform high-definition liposculpture, giving his patients athletic-looking bodies with minimal scarring.** The creator of high-definition liposculpture and other advanced body contour techniques, Hoyos combines his expertise in regenerative medicine therapies with other technologies to achieve spectacular results in aesthetic and anti-aging medicine.
