

STIHL

STIHL LEADING THE WAY

BENEFITS OF BATTERY

STIHL battery power uses cutting edge technology for homeowners and professionals that demand longer battery life, powerful performance and optimum flexibility to tackle any garden or landscaping project.

COMPATIBILITY

One battery for all. Upgrade to maximum battery life and ultimate flexibility with a STIHL Lithium-Ion battery system, boasting an impressive amount of rechargeable power to keep your outdoor power tools covered.

Lightweight, fast charging and easy to handle, STIHL batteries can be removed and replaced in a matter of seconds, delivering consistent power to master any challenge with confidence in medium and large sized gardens.

MOWERS THAT MOVE YOU

The new self-propelled RMA 460 V battery powered mower will take your lawn care forward. Clear the way even quicker with automatic ECO mode, flow optimised blades and variable speed propulsion for the most efficient mowing experience available yet. A second battery storage slot is fitted to extend mowing time, with a drive motor that can be disengaged at will to unlock more charge in the field. You'll always finish the job to the end, and return to charging base every time with lawn mission accomplished.
