

Corporate Partnerships

Inspire tomorrow's leaders. Drive your company's mission.

AMSA students were a big part of Thermo Fisher's High School Internship Program last summer.

We're delighted to have a few of these individuals returning again this summer, which helps fuel our long-term pipeline.

"This experience reminded me of why I entered the sciences long ago," said one of our leaders who worked with the students.

The success of this program is palpable. The students are inspiring us to drive our mission.

Michael Glass
Vice President, Global Talent
Thermo Fisher Scientific
