

Hope starts here.

At Rushford, a Hartford HealthCare Partner, the challenges of addiction are met by the passion of specialists who treat every client with care, compassion and respect—throughout their time with us, and even after. Helping others isn't just what we do. It's who we are.

Rushford is one of Connecticut's leading providers of addiction and mental health services.

We are accredited by the Joint Commission and have received national recognition for our success in delivering high-quality prevention services, treatment programs and life-changing clinical care.

Making compassionate, quality care affordable for everyone.

We believe that the cost of high-quality treatment should never prevent someone from receiving the care he or she needs. Rushford works with numerous insurance companies on behalf of our clients and their families to advocate for both in- and out-of-network coverage. For those individuals who do not have insurance or do not wish to use their insurance, we offer payment plans and sliding fee scales for those who qualify.

Recovery never stops. Neither do we.

Changing lives, saving lives.

Every year, right here in Connecticut, we meet more than 12,000 children, adults and families dealing with the devastating effects of addiction. Many will benefit highly from our prevention and wellness programs, while more than half will receive treatment in our evidence-based outpatient and residential programs, including our remarkable Stonegate residential treatment center for boys.

A Hartford HealthCare center of excellence, and a leader in substance abuse prevention and treatment for more than 35 years, Rushford has been recognized by the Department of Mental Health and Addiction Services for its research-based treatment models and proven prevention initiatives.

Treating with compassion, understanding and respect.

Our multidisciplinary team of experienced physicians, nurses and therapists understands the physical and emotional challenges of mental health and addiction, and empowers individuals and families to determine their best approach to recovery.
