HIGH TECH SUPPLY CHAIN EXCELLENCE:

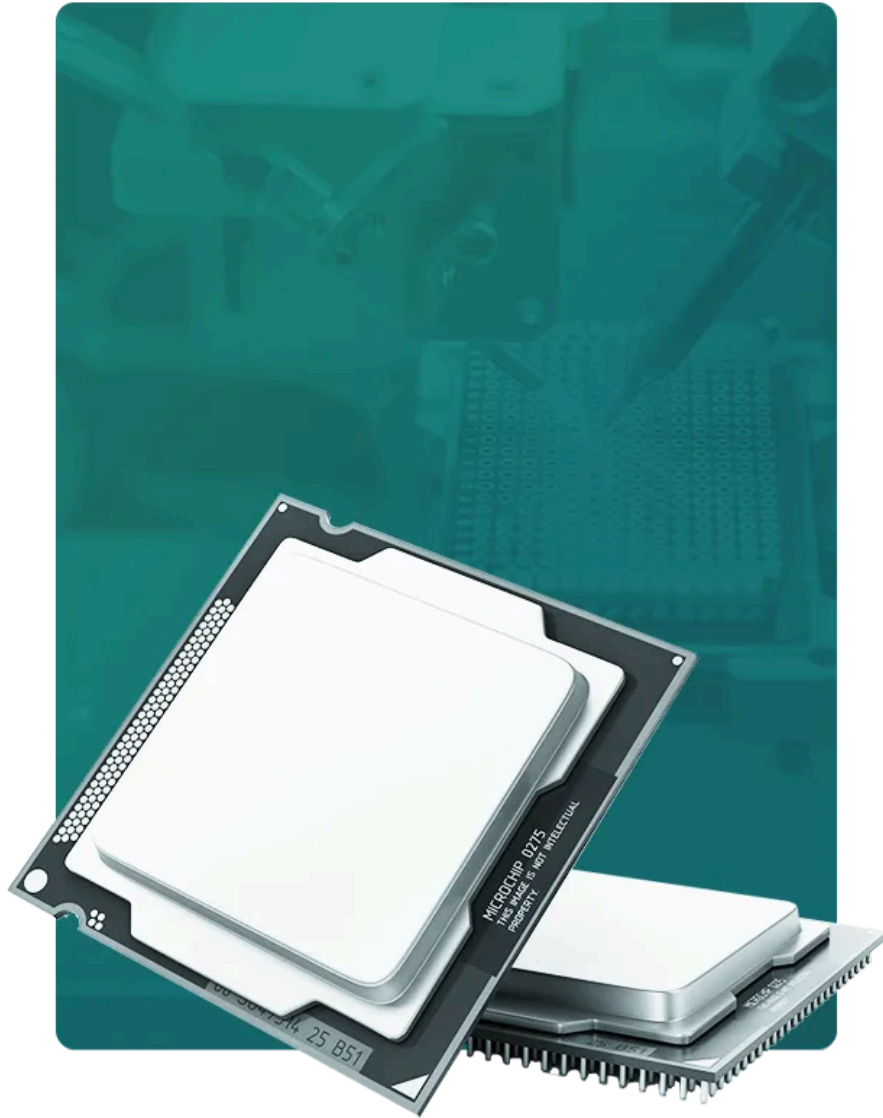

PRECISION, SPEED AND INNOVATION FOR HIGH-TECH SUPPLY CHAINS

Your innovative high-tech supply chain is a marvel, but with shrinking product lifecycles and intricate global supplier networks, it's also incredibly complex. With supply and demand volatility, changing consumer preferences, new products and economic fluctuations like tariffs, your end-to-end supply chain can be impacted in a number of ways at a moment's notice. Yet customers expect nothing less than the best, or they'll go elsewhere. Your competitive survival depends on your agility and resilience.

With Scott Sheldon, you can hardwire your supply chain with a cutting-edge planning platform. Always deliver top-notch products and impeccable service and exceed customer expectations.

HOW ARE KEY PAIN POINTS ADDRESSED WITH ADVANCED SUPPLY CHAIN PLANNING TECH?

Complexity & Performance Pressures

Scott Sheldon is becoming NEOS by Argon & Co. [Learn More](https://www.) (https://www. Seamlessly navigate the intricacies of your end-to-end supply chain, ensuring it performs at peak efficiency despite the pressures of ever-evolving innovation and customer demands.

Complicated New Product Introductions (NPI)

Manage the cost and complexities of bringing new products to market, from initial concept to market launch, with agile and adaptive planning solutions to keep track of every detail.

Integrating Supply Chain Through M&A

Efficiently merge diverse supply networks post-acquisition, turning disparate systems into a unified and efficient operation without missing a beat.

Lack of Global Visibility & Transparency

Enhance your global supply chain oversight with real-time data insights, enabling proactive and informed decision-making across time zones.

Circularity & Sustainability

Achieve your carbon reduction goals with circular supply chain strategies that reduce waste, promote environmental responsibility and send as little to the landfill as possible.

WHAT CAN SUPPLY CHAIN PLANNING TECHNOLOGY DELIVER?

INTELLIGENT SUPPLY CHAIN PLANNING

Leverage cutting-edge analytics and AI/ML to optimize every aspect of your supply chain, so you can make data-driven decisions to improve E2E efficiency and performance.
