

## WORDS // KATE EVANS

If you studied visual arts at school, you'd know that all colours and shades have an association and a meaning. For instance, red is the colour of passion and green is evocative of nature. Grey is solid, stable and creates a sense of calm and composure. White is associated with cleanliness and purity, offering a sense of calm.

This bathroom creates an atmosphere that is serene while boasting a look that is classic, elegant and never boring. By using various textures throughout the space — including a striking mosaic wall which ties all the shades of the room together — interest is added to the bathroom. Tiles from Tile Space are used on the walls and floor, which feature contrasting shades of grey. The floor is tiled in a darker charcoal which grounds the space, and the

glossy wall tiles use a much lighter shade of grey, creating an airy and calm vibe.

Not only does the white of the curved basin and bathtub add to the serene atmosphere, it also lends a contemporary edge. The feel of the bathroom contrasts with the eclectic character of the villa it resides in, allowing the room to act as a haven from everyday life. 🏡 [tiles.co.nz](https://tiles.co.nz)
