AB Vista partners with academic professionals to present latest fiber research at ASAS Midwest Annual Meeting

New research on the benefits of fiber in swine diets will be unveiled by a collaboration of academic experts at the upcoming American Society of Animal Science (ASAS) Midwest Annual Meeting, at a symposium sponsored by AB Vista.

The ASAS Midwest Annual Meeting is being held from March 10-13 at the Monona Terrace Community and Convention Center, Madison, Wisconsin. A featured highlight of the event, the 'Fiber and Its Benefits in Swine Production' symposium will take place on 12 March, from 1:15-5:00pm in Ballroom A.

The symposium will bring together respected experts to present on the advancement of fiber knowledge in pig production and its benefits in enhancing swine nutrition and overall gut health. Looking to the future of the industry, it will also provide the opportunity to brainstorm the next steps of fiber implementation for enhanced swine performance and productivity.

Keynote speakers include Dr. Amy Petry, Assistant Professor in the Division of Animal Science at University of Missouri; Dr. David Rosero, Assistant Professor in the Department of Animal Science, Iowa State University; Dr. Nick Gabler, Professor in the Department of Animal Science, Iowa State University and Laura Merriman PhD, Swine Technical Manager at AB Vista.

The symposium will conclude with an interactive Q&A session led by the speakers, to delve further into the topics discussed and foster collaborative learning.

AB Vista's Technical Team will also be presenting additional research on pig production throughout the ASAS event, including on:

- Achieving heavier piglet weights at weaning with live yeast (*Saccharomyces cerevisiae*) supplementation under field conditions (11 March, 10:00am, Grand Terrace)
- Use of 4500 FTU/kg of phytase on performance and blood parameters of finishing pigs (11 March, 3:15pm, Ballroom D)
- Incidence of porcine ear necrosis in nursery pigs under commercial conditions is reduced with stimbiotic (12 March, 4:30pm, Ballroom D).

Notes to editor:

AB Vista is a global animal nutrition technology company offering pioneering products and technical services to the global animal feed industry. Since its establishment in 2004, AB Vista has grown to be a top-three player in feed enzymes. Working in close collaboration with academics and customers, AB Vista is committed to developing new nutritional applications based on scientific insight. This is achieved through research, nutritional expertise and the ability to analyse nutritional factors – the combination of which is referred to as “feed intelligence”. This serves to bring an improved nutritional picture to the industry. AB Vista has a portfolio of products and technical services spanning the poultry, swine, ruminant and aquaculture sectors. AB Vista is headquartered in the UK, with regional offices located in the USA, Brazil, Singapore, Spain, India, The Netherlands and Finland.

AB Vista is part of AB Agri, which manufactures animal feed, nutrition- and technology-based products and offers data services for the agri-food industry and which operates all along the food industry supply chain.
