Characteristics and History

Venus has had many names. Early Greek astronomers knew her as Hesperus and Phosphorus

Venus like Mars was visible to our ancestors and for that reason played a vital role across mythology and ancient sacred sciences. And, like Mars was exhibited in all major pantheons and deity worship. The particular qualities of Venus are directly related to the time of year Taurus and Libra fall under. The Spring and planting season and the Fall equinox harvest. For this Venus was known as "The Great Mother", associated with luxury, comfort, and abundance. The Goddess Venus in Rome and Aphrodite in Greece portray similar aspects. A feminine symbol, vital to growth and balance, considering her pantheon counterpart was active Vulcan of Mars. Here we see counter-balance. The roots of Venus worship can be traced back to the Sumerian Cult of Inanna. Venus is exalted in Pisces, its detriment in Aries and Scorpio and its fall is in Virgo. Venus is associated with textiles, silk, copper, glass, the arts, fruits, flowers, and sugar. When in tune Venus frequency can lead to the ultimate balance and harmony in life. When out of tune Venus energy can destroy relationships and untie loving bonds. Skin disease is common with Venus afflictions.
