

**The
Legend
of
Turtle
Girl!**

How to make a wooden turtle...

She's looking great! Now for some sandpapering

All finished princess!

You go inside now I need to work

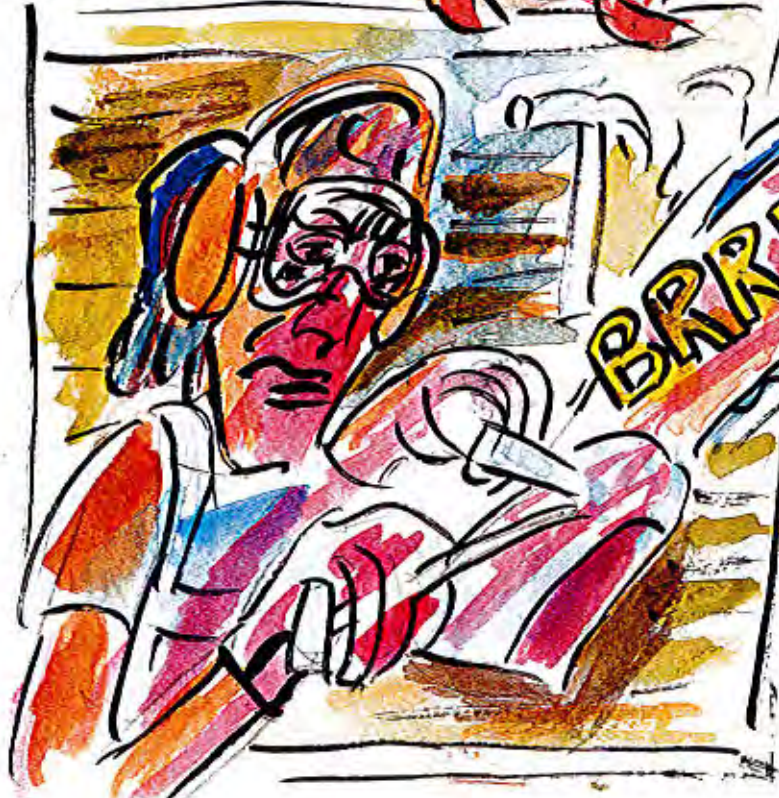

Thanks for your help Grandpa!

Granma

Look what I made!

BRRRM!

Coral Reef

But Granpa!
You can't stop
there! That
ending is
horrible.

Okay... but you
know why the
turtle let
herself be
caught?

It wasn't only for the sacrificial
feast the islanders gave
the gods. The turtle had
just laid her eggs on the
beach beneath the volcano.
She knew that if the
volcano got any bigger
or blew up, erupted, the
beach, the eggs and maybe
the whole island would be
destroyed.

So not only did
the ~~little~~ mother
help feed the islanders
and the gods who
created turtle
- girl.

Through her death,
she stopped the volcano
and saved her eggs
and those of all the
other turtles.

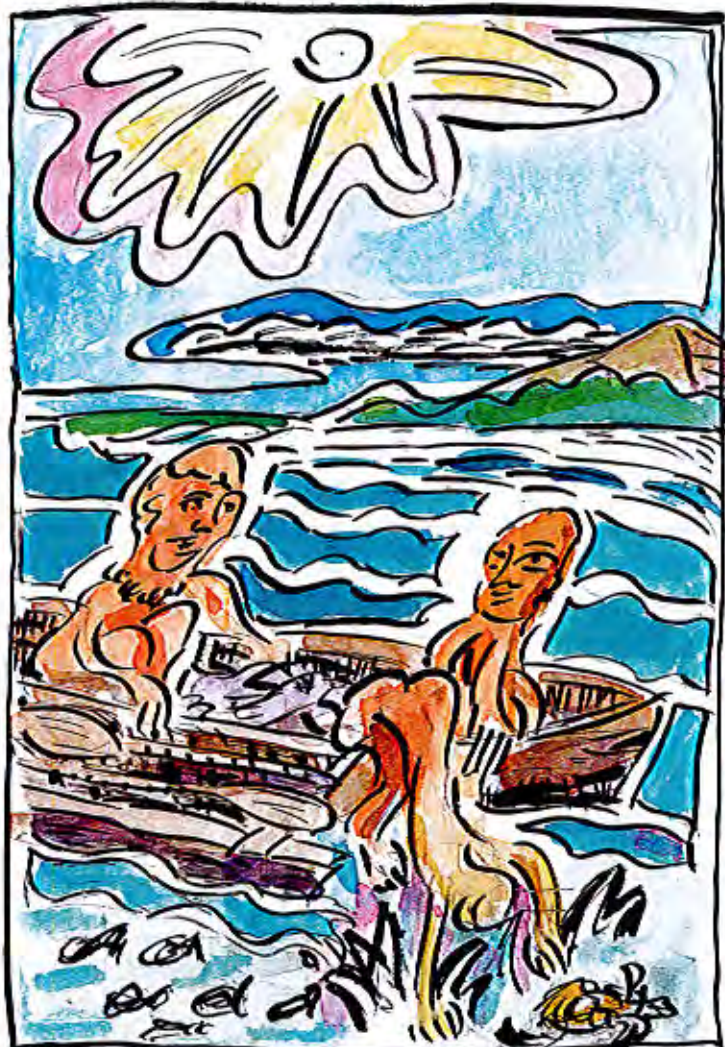

Coral Reef

Then about fifty
days later, hundreds
of baby turtles
hatched and
scrambled
to the
sea.

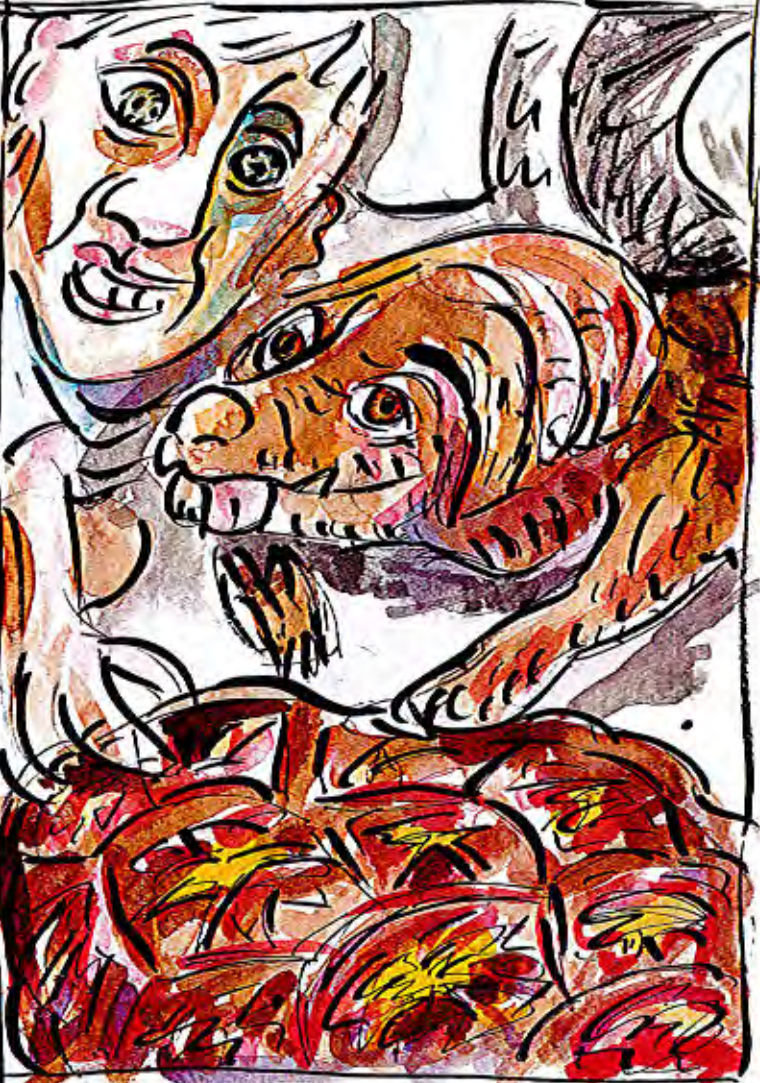

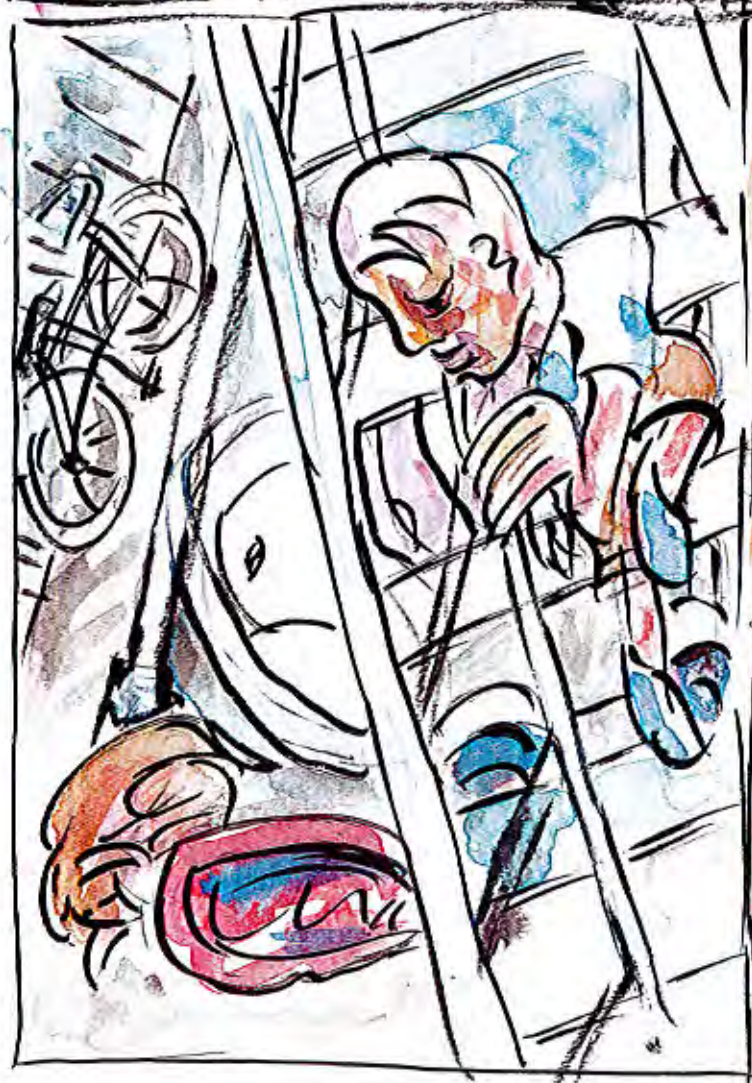

Nite Possum
sleep tight!

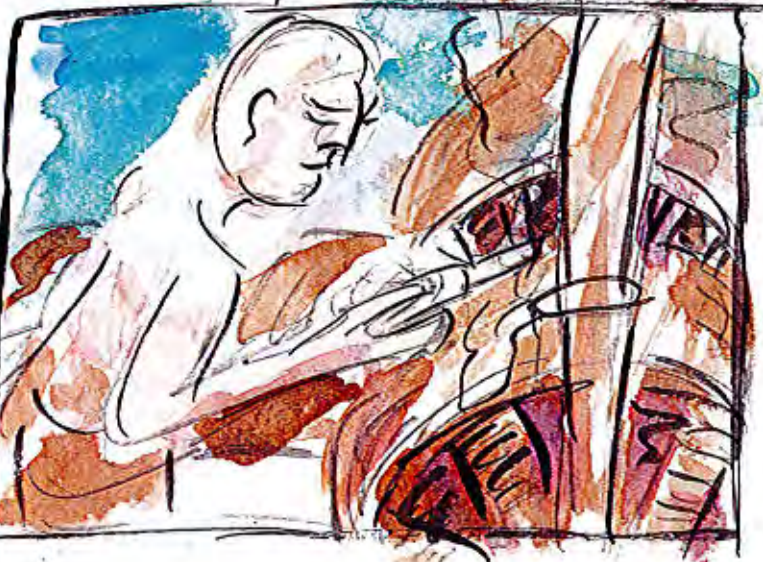

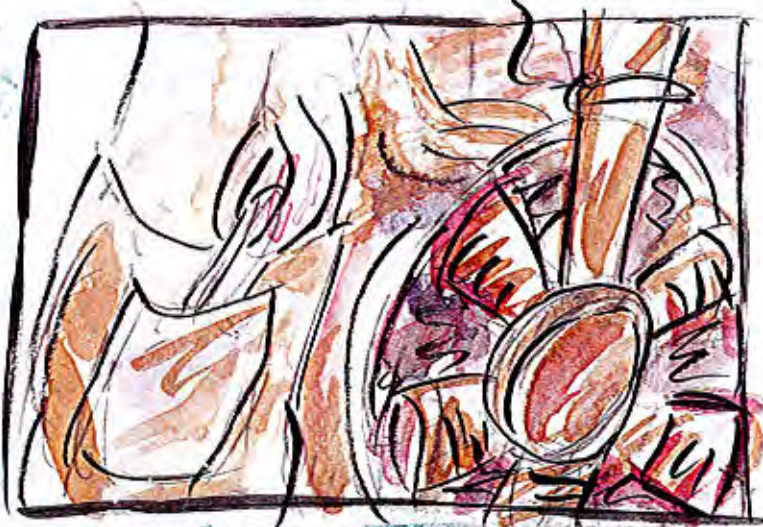

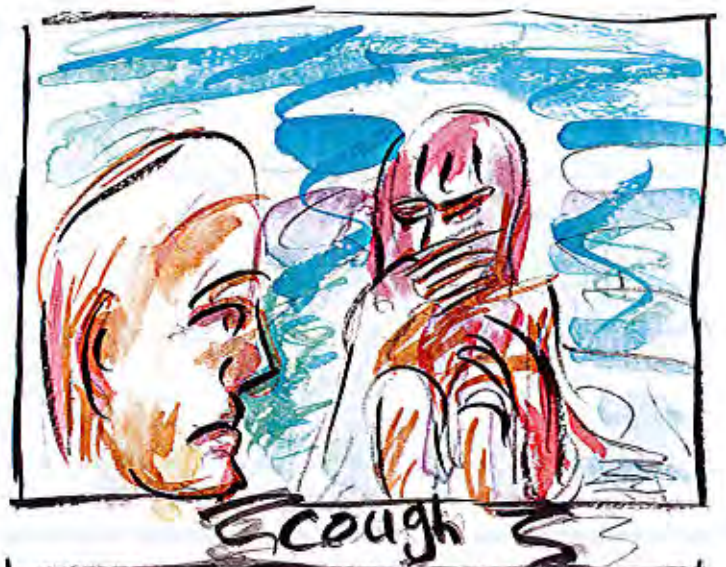

You might think that living on a tropical island, especially as a child with no responsibility was paradise — It was — but a paradise spoiled by several waves of invasion.

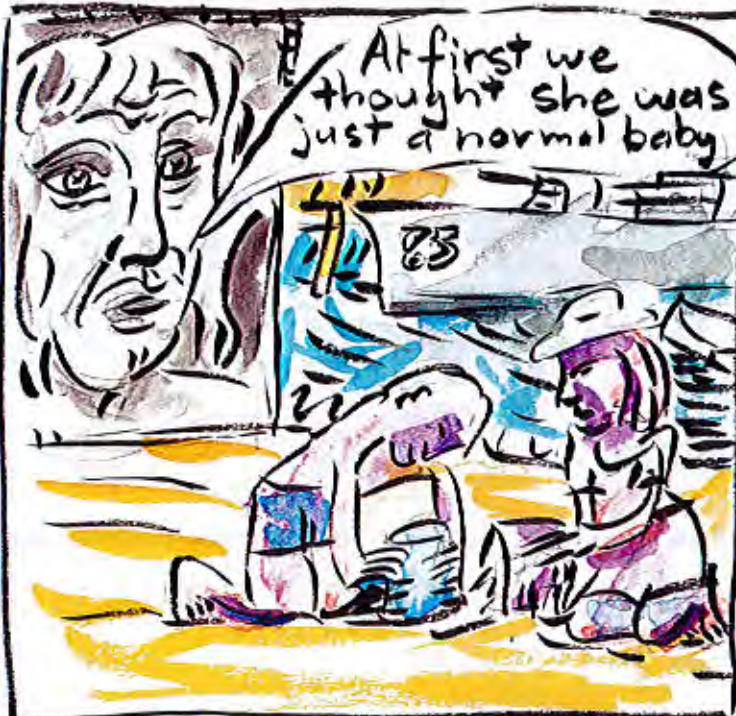

IGNITION

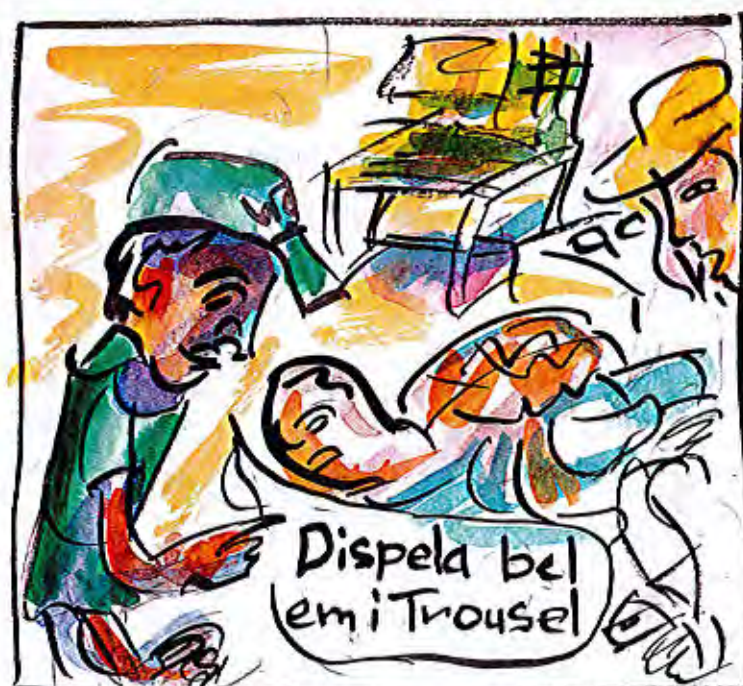

At first we
thought she was
just a normal baby

But sometimes
she didn't act
normal

My older sister Jo started school. A couple of years later I followed.

We'd rush home in the afternoon, knowing that someone would be waiting.

At least Jo then got
to spend the quality
time which she craved
with our mother.

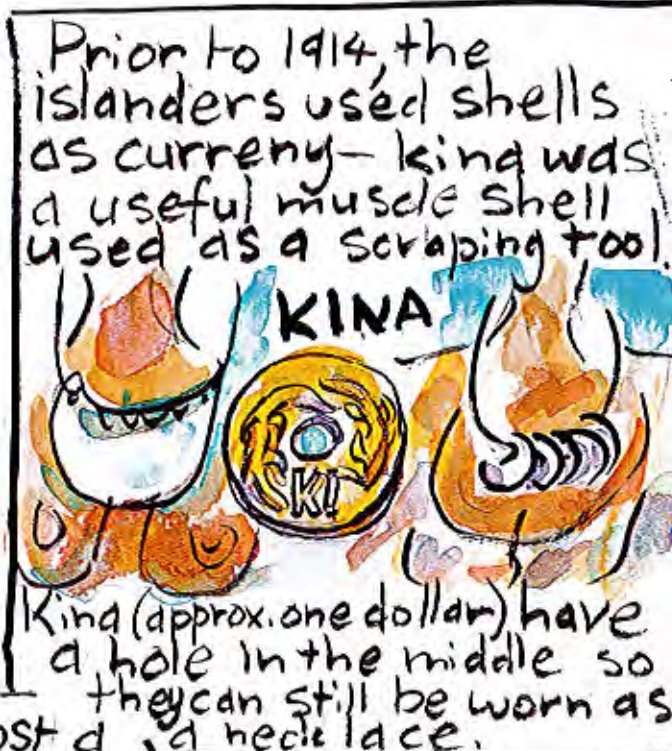

And my younger sis
was getting big enough
to play outside
with the other kids.

My younger sis
preferred to hang
with me and do boy
stuff... Lin soon
became the better shot,

(Havent you read
"To Kill a Mockingbird"
Arrgh!)

Some week ends, Dad would have to work.

As an engineer, he maintained the deisel engines that powered the naval base.

Lin would like to drop in to visit.

She soon had her own tool box. Dad would let her tinker with old engines.

AUSTRALIAN IMMIGRATION GAME

Hello boys and girls, I'm Australia's Minister for Immigration Peter "Potato-Head" Dutton.

I'm here to explain to you Australids immigration policy.

Simply put: if you apply through our consuls to stay in this country, even on a dodgy student or tourist visa, you are a good immigrant

But if you arrive by boat, even if you are a genuine asylum seeker from a war torn country..

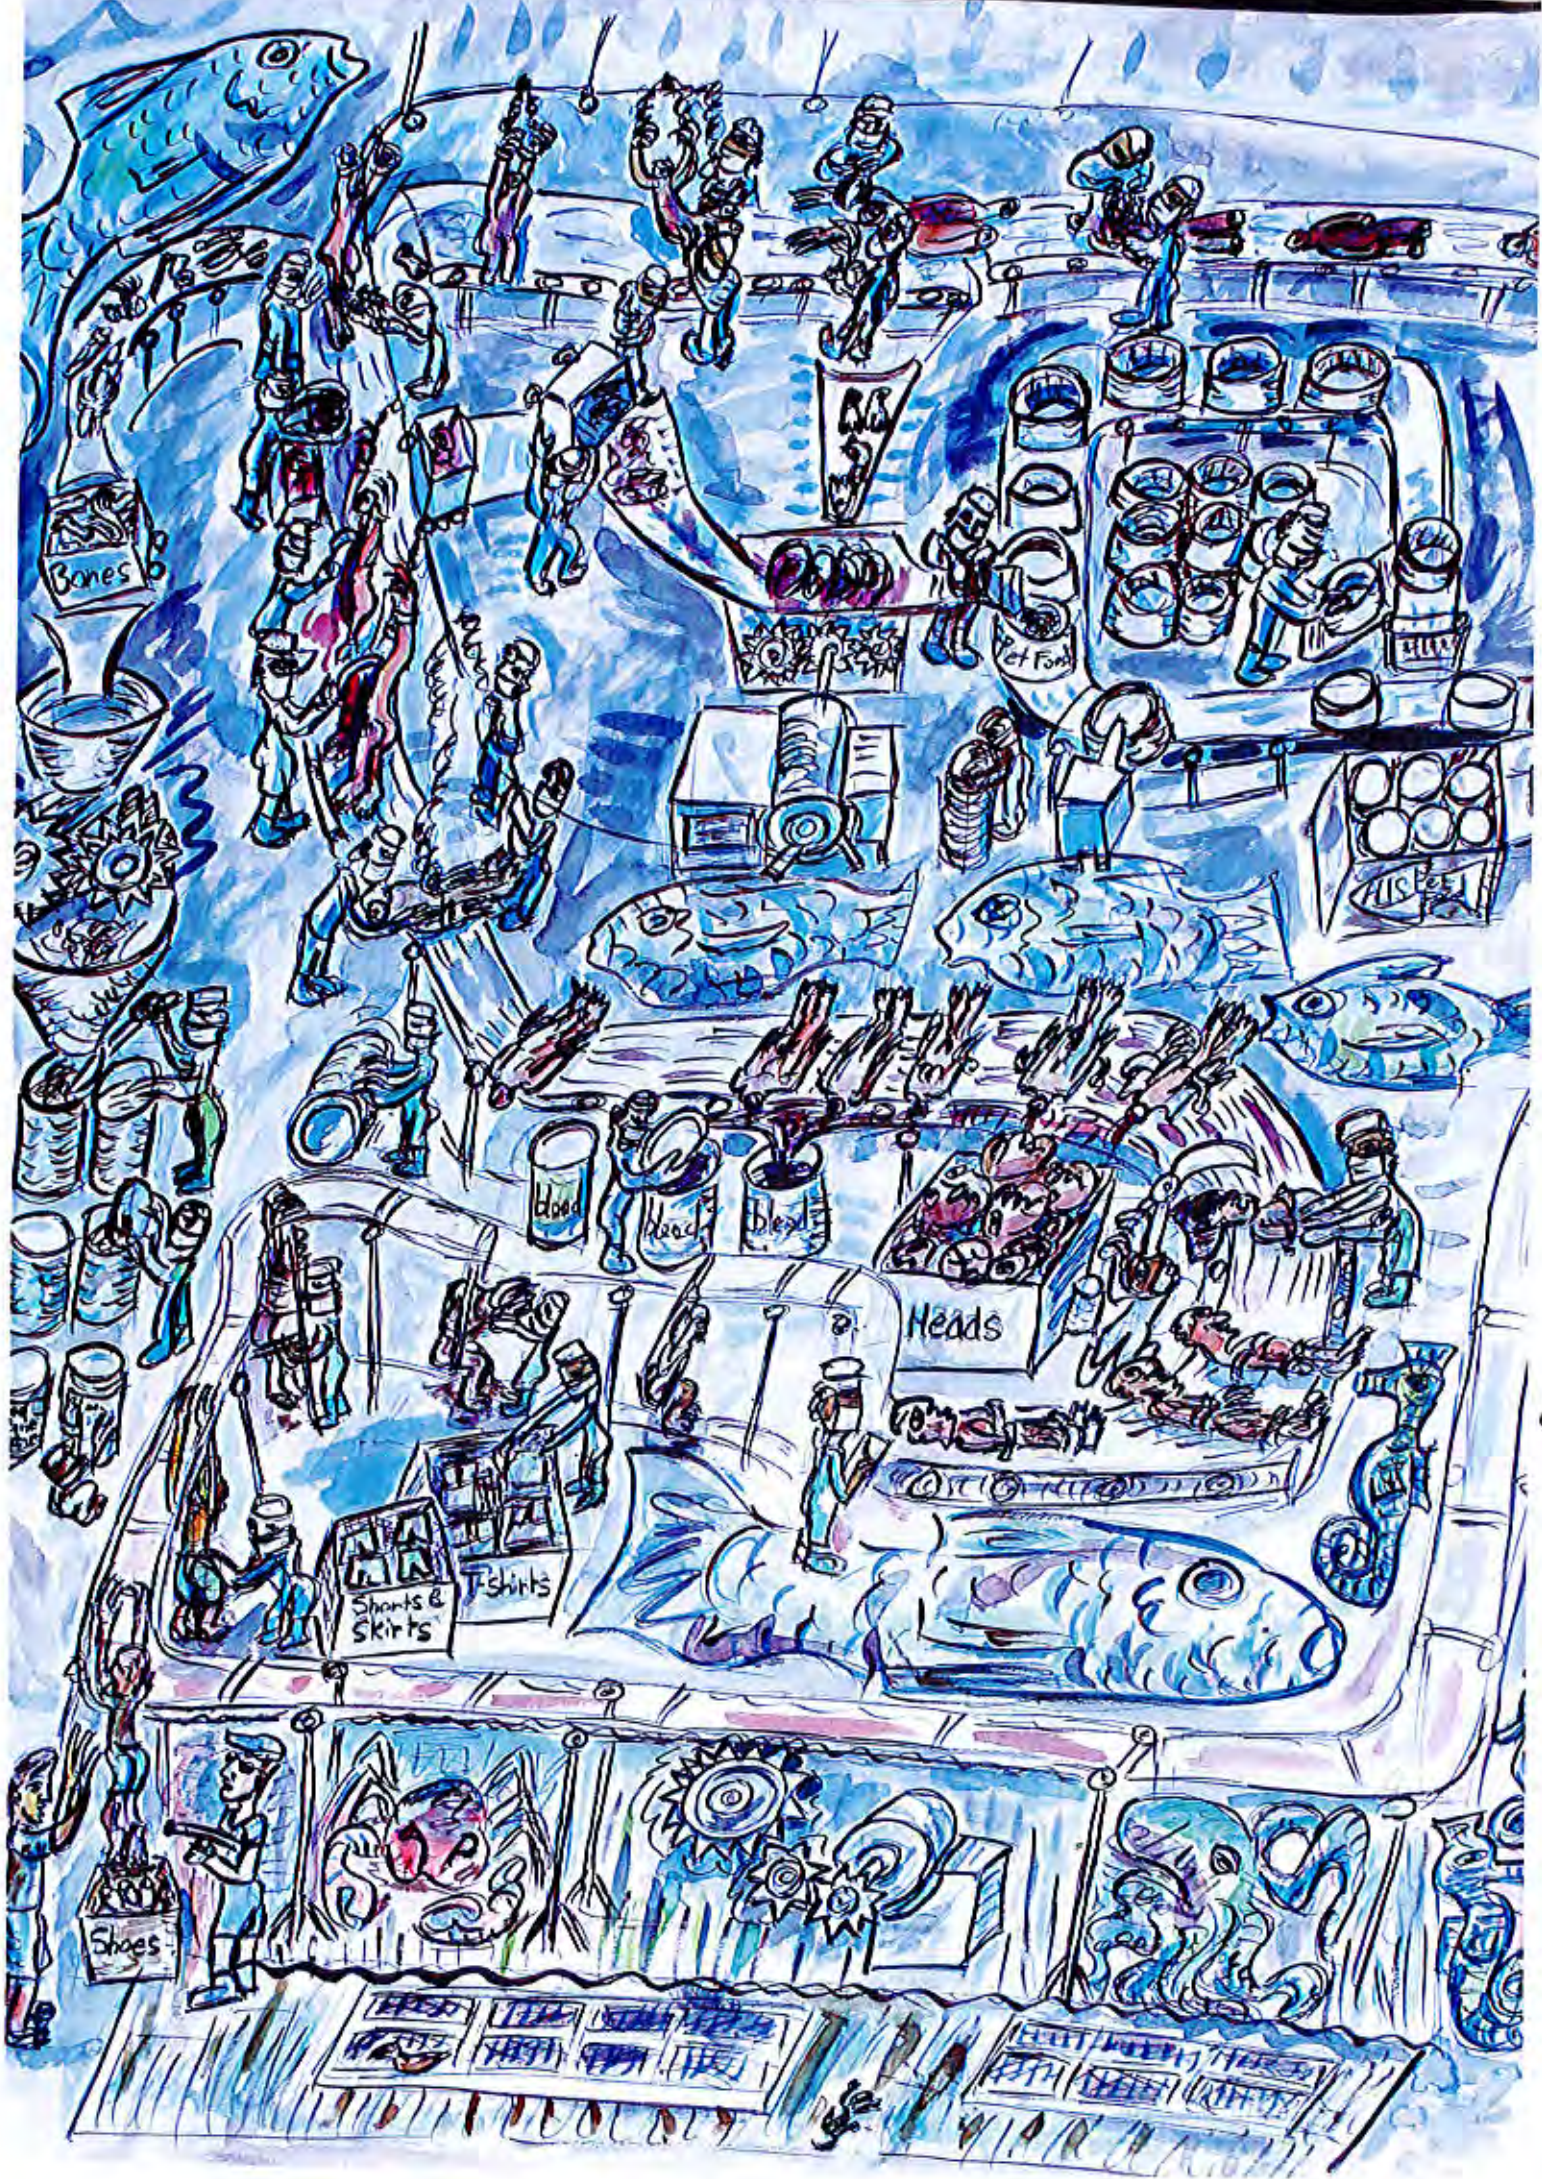

...you will be sent to our offshore detention centres at Manus, or Nauru.

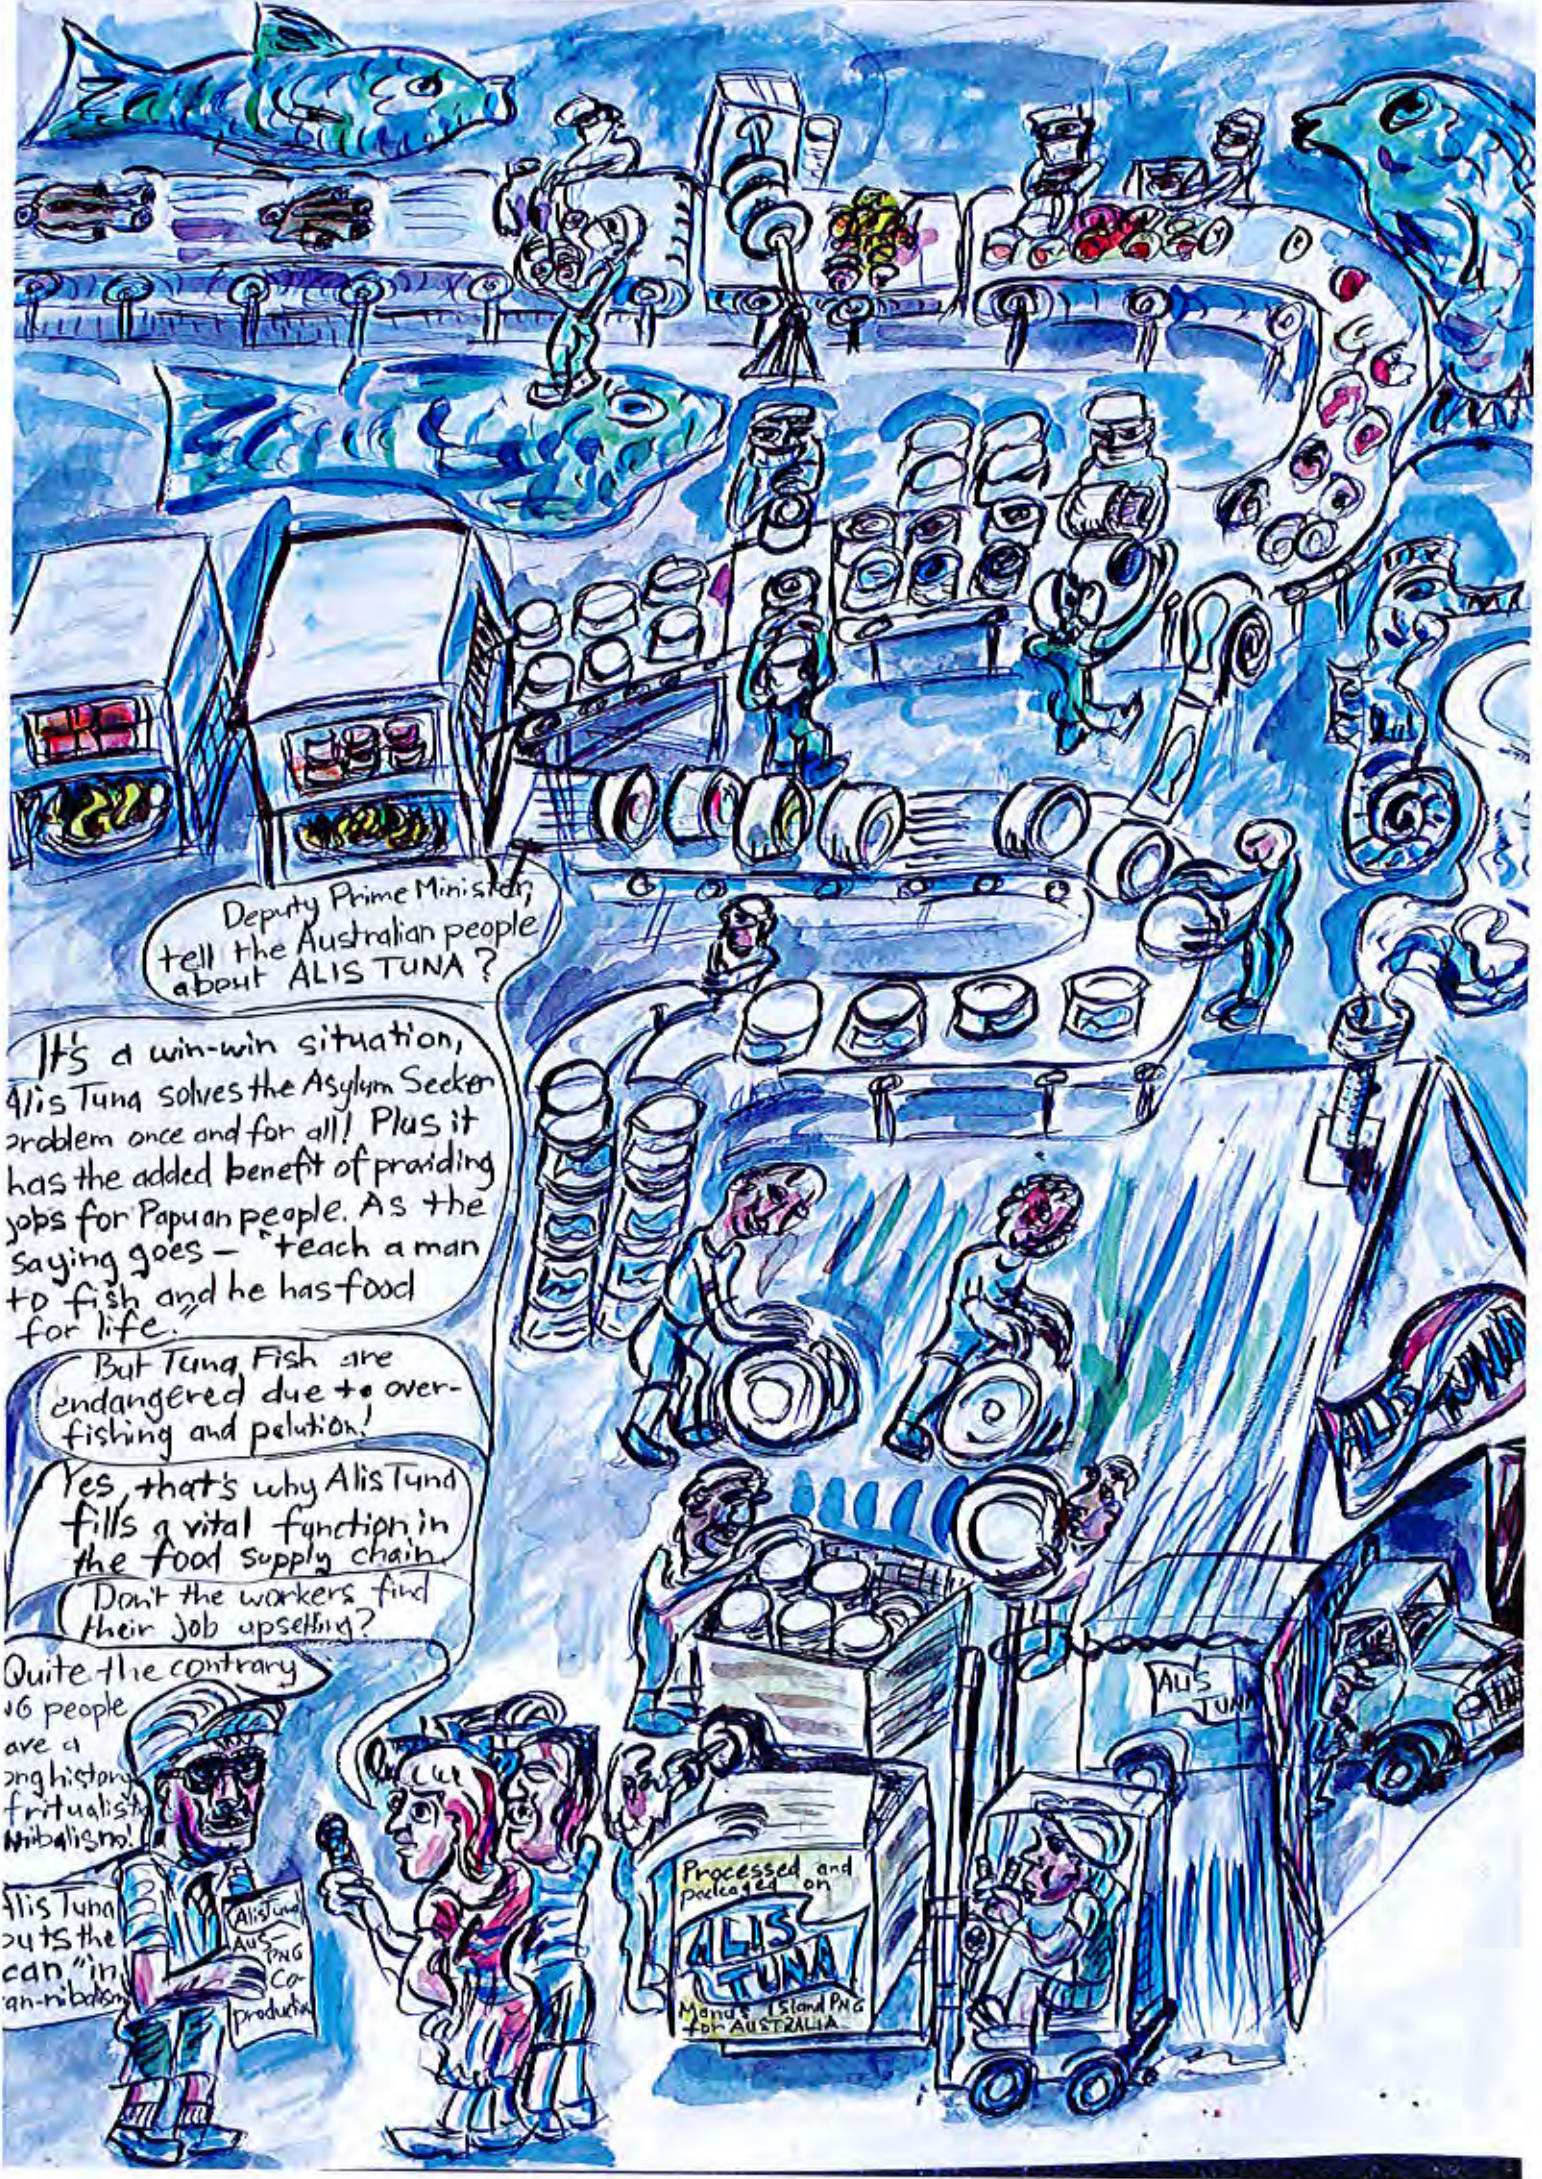

And be held there, confined, indefinitely. Unless you accept a return flight to your country of origin, or opt to become a citizen..

...of the third world countries of Nauru, PNG or Cambodia.

Despite the psychological and physical trauma that these conditions inflict upon these illegal refugees.. we will continue this harsh policy as it helps
STOP THE BOATS.

Deputy Prime Minister,
tell the Australian people
about ALIS TUNA?

It's a win-win situation,
Alis Tuna solves the Asylum Seeker
problem once and for all! Plus it
has the added benefit of providing
jobs for Papuan people. As the
saying goes - "teach a man
to fish and he has food
for life."

But Tuna Fish are
endangered due to over-
fishing and pollution!

Yes, that's why Alis Tuna
fills a vital function in
the food supply chain.

Don't the workers find
their job upsetting?

Quite the contrary

16 people
are a
single history
frictionless
liberalism!

Alis Tuna
puts the
can "in
an-ribon"

ALIS
TUNA

Welcome to Cooking with ALIS
with guest chef - Wendy Wallaby!

Good morning viewers and
thanks for tuning into ALIS
cooking show! Now for
those of you who are
sick and tired of the
taste of boring old
SPAM - its time to
try the exciting
new taste
of

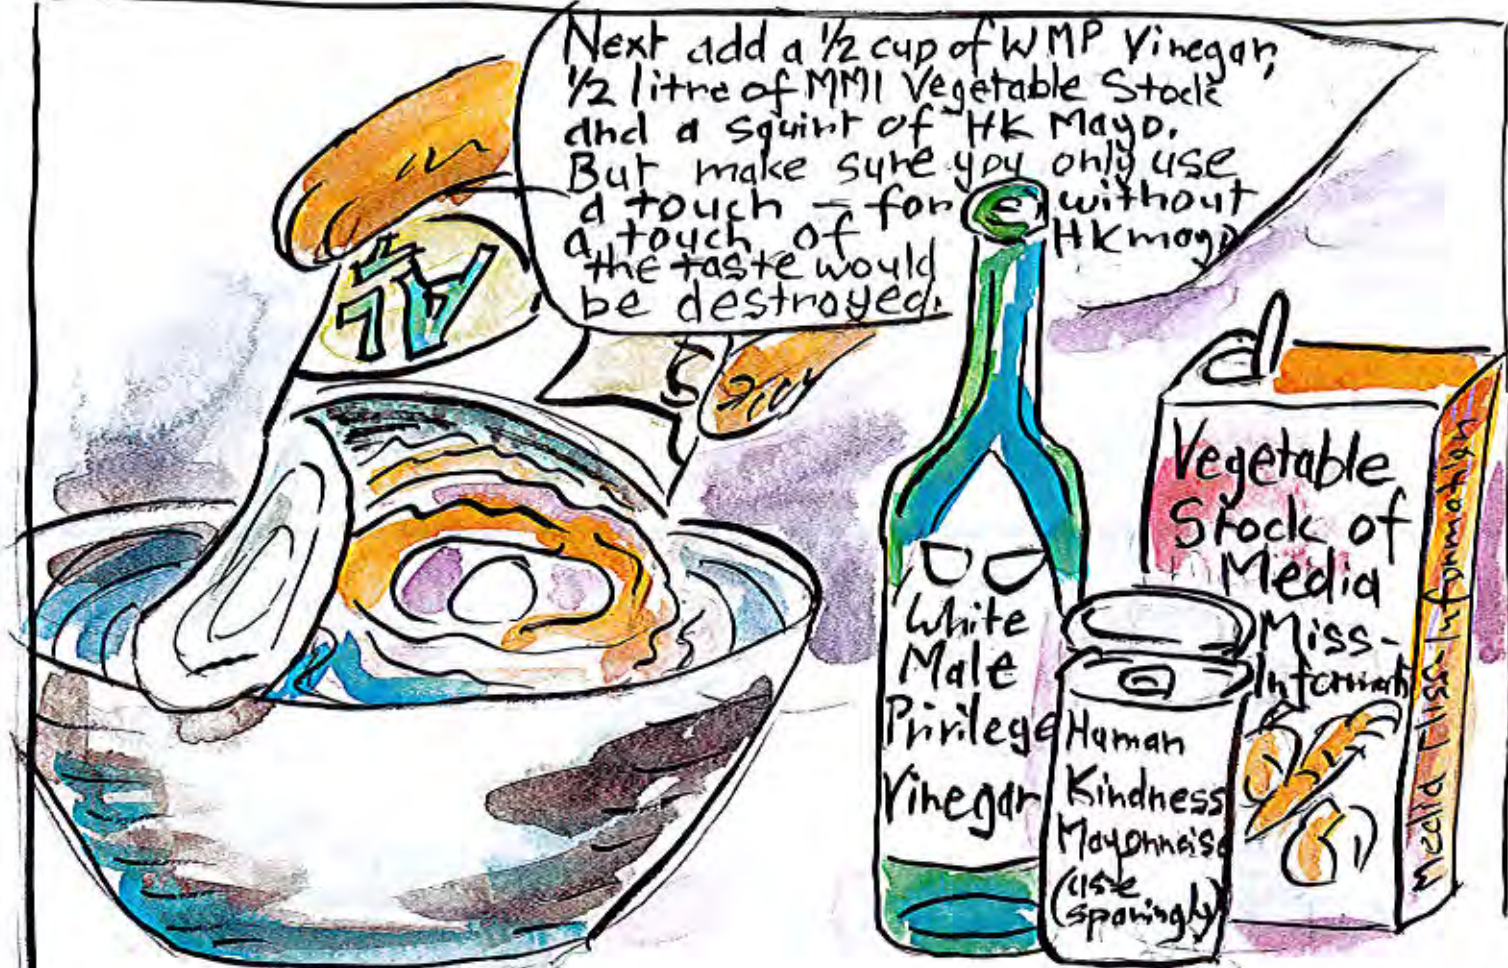

ALIS
TUNA

SPAM SPAM

Today we'll be making ALIS
Tuna Patties! First, take
one tin of all new-freshly
made on Manus Island - ALIS
TUNA. Open it! (Damn,
this is tricky without
opposable thumbs!)
Then empty your tin
of ALIS into a large
mixing bowl.

Made on
Manus
Island
ALIS
TUNA
Product of Australia

Next add a 1/2 cup of WMP Vinegar,
1/2 litre of MMI Vegetable Stock
and a squirt of HK Mayo.
But make sure you only use
a touch - for without
a touch of the taste would
be destroyed.

Then put the ALIS mix
aside whilst you prepare an
equal amount of spuds -
three large potatoes should
do. Next, add them, skin
and all to a pot of
boiling water.

Hey! There's only
two spuds! Someone
get me another one!
What kind of cheap-
prge channel is
this?
