

# DIY → CRAYON ART

## Materials:

- Canvas
- Hot glue gun
- Packet of crayons
- Hairdryer
- Newspaper

## Preparation:

**Step 1:** Lay down newspaper so you're prepared for things to get messy. Sort crayons into any order you like and line them up.

**Step 2:** Glue the crayons onto the canvas.

**Step 3:** Lean the canvas against some jars or tins so the crayons will melt downwards. Melt crayons using the hair dryer on the highest level. The closer the hair dryer is to the crayons, the quicker they melt. The crayons will melt in the direction you have the hair dryer pointed. To get a feel for how it works, you could do a practice run on cardboard first.

Enjoy your colourful masterpiece!
