Business Resilience Means Employees Are Ready to React  
**IN AN INSTANT**

# Modern Threats Demand Modern Tools.

Emergencies happen when we least expect them. When seconds matter, there's no time to scramble trying to locate a printed emergency response plan. We live in a mobile world, and should be able to instantly access critical emergency information and notifications from our mobile devices.

## Discover ERP-RedE™: Mobile Emergency Response Plan for Payers.

Health insurance organizations invest a significant amount of time, money and resource into developing emergency and disaster plans, but if these plans are not readily accessible, then the value is limited. ERP-RedE is a mobile emergency response plan that shifts paper-based plans out of the three-ring binder and into the smartphones of employees.

From keeping employees safe during weather emergencies to contending with spills, accidents, and system failures, our mobile application delivers immediate access to the appropriate response procedure. No more fumbling trying to find paper plans - with ERP-RedE - the information you and your colleagues need is available anytime and anywhere.

## Benefits:

### 1. Saves Money

Eliminates the cost and labor of designing and printing paper emergency plans.

### 2. Accelerates Response

Enables instant emergency response via one-touch access to vital information.

### 3. Unifies Communication

Coordinates national response actions through real-time mass notifications.

### 4. Automates Updates

Ensures content is always accurate through live content editing and publishing.

### 5. 100% Customizable

Plans, content and modules can all be flexibly customized to your business.

**MINIMIZE RISK  
WITH NEXT-LEVEL  
READINESS**
