

CommONE™

Print Services

The perfect blend of price, quality and speed.

CommONE: Print Services offers a broad portfolio of production capabilities supported by an array of strategic planning, project management and reporting services. We unite our professional services with state-of-the-art production technology to deliver the most advanced approach to print management in the industry.

Project Management

We apply project management processes that emphasize collaborative requirements gathering, definition and documentation. Production scheduling is managed via real-time custom reports.

High-Speed VDP

Our variable data capabilities enable clients to accelerate healthcare education, preventative care and wellness campaign initiatives through simplified production of highly personalized, variable data embedded materials.

Versatile Output Options

We offer the most comprehensive array of print services in the industry, which enables us to mingle diverse production methods in order to achieve lowest cost per piece.

Fulfillment Optimization

Recognizing that the cost of kitting can often outweigh that of production, we apply a systematic approach to kit assembly that identifies any and all opportunities to consolidate and reduce weight.

Digital Print Integration

We help our clients integrate digital print-on-demand into the fulfillment cycle in order to reduce overall print volume, obsolete inventory and warehousing space.

24/7 Business Continuity

Our commitment to the capacity and fail-safe backup capabilities that are required in a compliance-driven industry is evidenced by our ISO 27001 certification.

CommONE: Print Services offers insurers a single entry point to full-service customer communications management, made possible through our unique access to world-class production and fulfillment capabilities that include:

Production Capabilities

- Full-color variable data printing
- Zero-make ready offset printing
- High-integrity, data-driven mail insertion lines
- Scan-verified kit assembly
- Barcode verification on all materials
- Advanced pre-media services
- Portfolio of HP Indigo 4-color variable digital presses
- Fleet of HP high-speed inkjet web presses
- Full-color, fully personalized content at rate of over 14 million 8-1/2" x 11" pages per day
- Flexible binding and finishing options
- Online ordering and fulfillment
- Virtual document warehousing

Distinguishing Factors

Our robust suite of production and fulfillment capabilities, coupled with our integrated document management software and services, deliver unparalleled communications quality and cost efficiency through our ability to:

- Leverage combinations of traditional and digital print methods to achieve lowest-cost on individual piece basis
- Minimize warehousing and pick and pack costs
- Seamlessly integrate one, two and four color printing initiatives at minimal cost
- Produce 100% variable content across short and long page count content
- Accommodate short and long run production
- Support flawless production of highly custom packaging and personalized marketing materials with integrated tracking
- Integrate high-visibility production processes that utilize real-time reporting platforms
- Manage complex kit assembly rules across all variants
- Design QC and logistics processes that support integration with specific workflow demands
- Improve process control by applying collaborative project management tools
- Establish and execute sophisticated escalation protocols and procedures
- Implement zero inventory production and near-zero inventory automated replenishment programs
