

GIGAOM VOICES IN AI

IN-DEPTH INTERVIEWS WITH THE LEADING MINDS IN ARTIFICIAL INTELLIGENCE.

ABOUT THE PODCAST

Published and sponsored by Gigaom, Voices in AI features today's most prominent authors, researchers, engineers, scientists and philosophers exploring the economic, social, ethical and philosophical implications of artificial intelligence. Approaching its hundredth episode, this thirty-minute podcast, led by GigaOm CEO Byron Reese, features the most prominent minds in AI. Notable guests include Stephen Wolfram, Kevin Kelly, Esther Dyson, Nick Bostrom and more.

"This is one of the best conversations I've had," says Kai Fu Lee, CEO of Sinovation Ventures and former President of Google China.

"Artificial intelligence isn't overhyped," says Reese. *"The optimists and pessimists believe one thing in common: That AI will be transformative. Voices in AI strives to document that transformation."*

FORMAT:

A thirty-minute conversational style interview, the discussion includes a range of viewpoints and centers on familiar terrain relating to jobs, robots, and income inequality, while some episodes reach more far-flung topics including:

- Advanced General Intelligence (AGI)
- Conscious Machines
- Robot Rights
- Weaponized AI
- Ethical Implications and Impact on Humanity

ABOUT THE HOST: BYRON REESE

Prominent futurist, accomplished technologist and patented AI practitioner, Byron Reese is the CEO and publisher of GigaOm. Byron's newest book "Fourth Age: Smart Robots, Conscious Computers, and the Future of Humanity." is described as "entertaining and engaging" by The New York Times, and is among 800 CEO READ's Top 25 Best Selling Books of 2018. Byron is also the author of "Infinite Progress, How the Internet and Technology Will End Ignorance, Disease, Poverty, Hunger and War."

Byron possesses a diverse body of patented work and enjoys talking about the intersection of technology, history and the future to both technical and non-technical audiences around the world. Byron believes that humanity is about to be transformed a fourth time, due to artificial intelligence and robots. He frequently speaks to businesses on how to excel in the world of tomorrow, and how to deploy technology successfully.
