The improved app's super handy features mean you're the boss of your account

By Virgin TV Edit

Whether it's topping up your data, setting a cap on your spending, or messaging a customer care assistant easily, the Virgin Mobile app lets you do all of this and more at the touch of a button.

So, if you're thinking about downloading the app (which you can do at the bottom of the page) or already have it but need reminding what you're missing out on, let us bring you bang up to speed...

Check your plan

From staying on top of your allowances to tracking your usage, viewing your monthly plan cost and more, the Virgin Mobile app puts you in complete control.

Stay topped up with add-ons

Run out of data before the end of the month? Get back in the game by purchasing add-ons to keep you connected before your allowances kick back in.

Set a Spending Cap

Control how much you spend each month outside your normal allowances with this handy new function. Set a cap on your spending and make sure you don't get any unwanted surprises on your next bill.

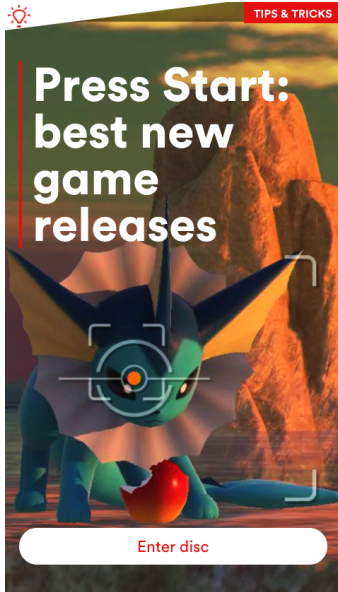

Message a customer care assistant

Need a helping hand with something? The Virgin Mobile app lets you message a member of our team to get issues resolved as quickly as possible.
